

Jira Risk & Compliance Project

Mock project configuration, workflow, sprint board, and sample remediation ticket

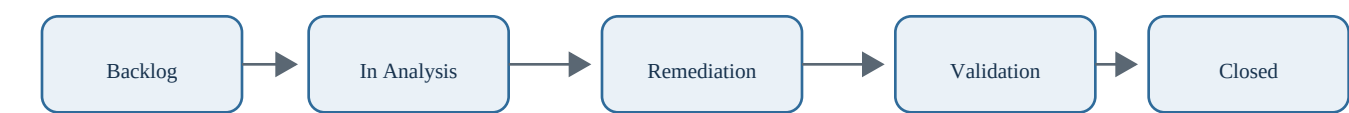

Project Configuration

This portfolio artifact shows a realistic Jira-style workflow for tracking GRC findings and remediation. The examples are mockups and do not represent production Jira data.

Issue Types

Type	Purpose	Example
Epic	Groups a compliance initiative	SOC 2 Readiness - Access Controls
Risk	Records the risk statement and scoring	Excessive privileged access
Control Gap	Documents a missing or ineffective control	Quarterly review evidence unavailable
Remediation Task	Tracks corrective work	Remove dormant privileged accounts
Evidence Request	Collects audit support	Export Q2 user access report

Workflow

Sample Sprint Board

Backlog	In Analysis	Remediation	Validation	Closed
GRC-108 Vendor tiering	GRC-103 Missing tabletop	GRC-099 Remove dormant admins	GRC-095 Validate MFA rollout	GRC-087 Policy approval

Backlog	In Analysis	Remediation	Validation	Closed
GRC-110 Evidence retention	GRC-104 Patch SLA exception	GRC-101 Update access-review SOP		GRC-091 Backup restore test

Sample Ticket

Field	Value
Key	GRC-099
Summary	Remove dormant privileged accounts
Risk	Unauthorized access through unused administrative credentials
Acceptance Criteria	All accounts inactive >45 days reviewed; unnecessary access disabled; evidence attached; owner validates closure
Priority	High
Owner	IAM Manager
Linked Control	SOC 2 CC6.1 / CIS Control 6
