

Access Review (RBAC) Workbook

Quarterly user access certification and segregation-of-duties review

Scope

This access-review workbook documents a quarterly certification of user and privileged access for a fictional finance application.

Role Definitions

Role	Allowed Access	Restrictions
AP Clerk	Create and edit vendor invoices	Cannot approve payments
AP Approver	Approve invoices and release payments	Cannot create vendors
Finance Admin	Configure workflows and roles	Privileged; separate named account required
Auditor	Read-only reports and evidence	No transaction changes

Quarterly Access Certification

User	Department	Role	Manager Decision	Issue	Remediation
A. Chen	Finance	AP Clerk	Approve	None	None
D. Patel	Finance	AP Approver	Modify	Also creates vendors	Remove Vendor_Create permission
M. Green	IT	Finance Admin	Approve	Privileged account has no expiry	Set 90-day review date
J. Rivera	Audit	Auditor	Approve	None	None
S. Lee	Former Contractor	AP Clerk	Revoke	Contract ended	Disable account immediately

Segregation-of-Duties Findings

Conflict	Risk	Resolution
Vendor creation + payment approval	Fraudulent vendor and unauthorized payment	Remove vendor creation from approver role
Admin configuration + transaction approval	Control override without independent review	Use separate privileged account and prohibit transaction approval

Certification Summary

5 accounts reviewed: 3 approved, 1 modified, and 1 revoked. All remediation tickets should include the user, entitlement, approver, date, evidence, and closure validation.
